

1. Carrega la informació de l'arxiu [Employees.xml](#) al mysql workbench. Explica tot el procés amb captures de pantalla i copia el codi.

No ha estat molt difícil. El MySQL Workbench ja el teníem instal·lat de l'assignatura de bases de dades i l'únic que he fet ha estat crear la base de dades, seleccionar-la amb **USE** i finalment crear la taula per emmagatzemar les dades dels empleats.
